

MINAS AMERICAS · DISCLOSED EXPLORATION EVIDENCE

Where shallow repeats.

75 surface/trench samples at 61 mapped locations · 297 drill holes · 6 Oct 2025 to 16 Jun 2026
Colour and pattern = press release in which results first appeared · not drilling date, grade, geology or confidence
North-up equal scale · point locations only · no interpolation or inferred mineralised boundary

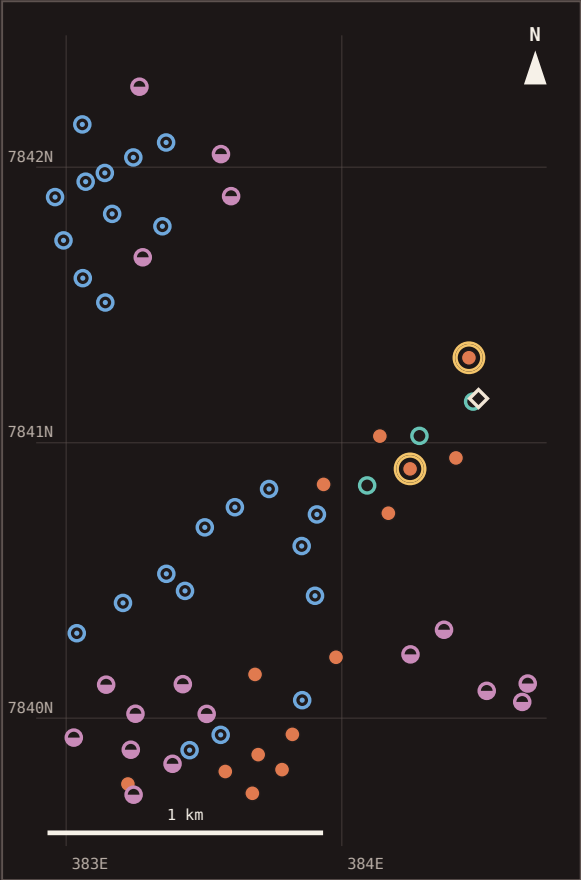

RESULTS FIRST DISCLOSED IN PRESS RELEASE

- 06 OCT 2025**
75 one-metre samples · 61 plotted locations
- 02 DEC 2025**
+3 holes · 3 cumulative
- 26 JAN 2026**
+24 holes · 27 cumulative
- 17 MAR 2026**
+17 holes · 44 cumulative
- 16 JUN 2026**
+253 holes · 297 cumulative

SYMBOL KEY

- diamond · surface/trench location
- circle · drill collar
- double halo · selected June interval

PT-34 DISCOVERY NUCLEUS · 58 DRILL COLLARS

HOW TO READ THE MAP

Colour and marker pattern show the press release in which each analytical result first appeared.

Diamonds represent the 61 mapped surface or trench locations disclosed in October. Circles represent 297 drill collars.

The PT-34 inset enlarges the discovery nucleus so all four drilling disclosure rounds can be compared directly.
